Numb. 3673.

Wednesday, July 22, 1713.

London, July 22.  
Yesterday arrived from Holland the Mail of Friday last.

From the Amsterdam Courant, dated July 22.

Genna, July 9.

**B**y the last Express, which is arrived in three Days from Barcelona, we have an ample Account of the State of Affairs in Catalonia, containing in Substance, That the Catalonians, resolving not to submit to the Spaniards, have put 6000 of their Men into Tarragona, that they have intrusted the Government of that Place to Don Juan la Porta; that the German Garrison of Tarragona, as well as that of Fort Montjoui at Barcelona, had been obliged to evacuate them to the Catalonians; that there had put 800 Men under Don Sebastian de Dalman into Montjoui; that Count Starbuck, having quitted Barcelona, had taken his leave from thence on the Rivalos of Belus; that the Catalonians had made themselves Masters of 6000 Men, and that 800 Spaniards who were in it, had taken Service under the Catalonians; that the Marquis del Daal, a Catalonian, was appointed Governor of it; that Orlans, another strong Place, being quitted by the Germans, was possessed by the Catalonians; that the States of the Principality of Catalonia had determined, to send into the Field an Army of 20000 regular Soldiers, besides Volunteers and Miquelets; that a Contribution was sent for their Subsistence and Pay, that on the waying the extraordinary Expence of the War, the wealthy chiefly gave in their Jewels, Gold and Silver; and that those who were formerly inclined to the Party of King Philip finding their Countrymen were to be deprived of their ancient Privileges, had declared with the other Catalonians, that they would risk their All for preserving them; and that they had already advanced great Sums of Money, among others General Pons, who being a Prisoner at large in Barcelona on his Parole, had declared for the Liberties of his native Country; Three Palatine Colonels, with their Men, having offered their Service to the Catalonians, were accepted by them. General Nebot was made Commander in chief of the Volunteers of Arragon and Valencia, making 3000 Men; the Casa de la Puebla General of the Foot, and Signior Villa Real General of the Horse. Good Order was likewise taken about Provisions, great Quantities of Corn being got together, without reckoning the Crop of this Year, which is very plentiful; and every Soldier is to receive every 10 Days a Crown and a Half. Some Vessels armed and manned with Miquelets were likewise fitted out, to cruise on the Coasts, and the Islanders of Majorca had followed their Example. The Arms of his Imperial and Catholic Majesty continue up in Barcelona and in Fort Montjoui. The Spaniards having not imagined to meet with this Firmness and Constancy in the Catalonians, have not made due Preparations for War, and are much perplexed, having to do with Men who chuse to undergo the last Extremities, rather than submit to them. The Clergy of Catalonia are continually at their Devotions, the Women of all Qualities pass whole Nights in Prayer, and the Hearts of the whole People seem extremely touched with what they are about. The Express which brought these Particulars, came hither in a Killing-Bark, and is gone on for Vienna.

From the Hague Courant, dated July 12.

Genna, July 13. The Imperial Troops brought by the Transports to Vado were landed the 11th and 12th, and are forthwith to put themselves on the March. Those Transports are sailed again for Barcelona, to fetch off more of the German Forces.

From the Amsterdam Courant, dated July 20.  
From the Army near Philipbourg, July 12. We

have a Report that the 11th Instant, Prince Alexander of Wirtemberg made a Sally out of Landau, on which Occasion the Enemy lost a good Number of Men with about 30 Officers, and a Prince of the Name of Talbot was shot through the Body. The Enemy have formed a Redoubt called Eugene, but were beaten off with great Loss.

From the Amsterdam Courant, dated July 20.

From the Camp at Philipbourg, July 22. The Enemy continue to attack Landau with all possible Vigour. The Besieged defend themselves well. The 11th Instant, having assaulted the Redoubt Eugene, were repulsed with the Loss of a great many Men, and of a Lieutenant-General.

From the Camp at Philipbourg, July 22. The Troops of Hanover, to the Number of about 18000 Men, are now under the Orders of Prince Eugene, who has sent to them to advance to Mentz. The Troops of Hesse-Cassel will likewise move the same Way, as also all the Saxon Troops which were in the Country of Eisenach, and which received an Express from Warsaw the 18th, with Order to join the Imperial Army.

From the Hague Courant, dated July 22. Prince Eugene having been at Mentz, took his Way from thence by Darmstadt to his Army, and the Duke of Marlborough with Mr. Cadogan came back with the 10th. Preparations seem now to be making in earnest for stopping the Relief of Landau by passing the Rhine at Mentz. Yesterday the Grandmaver of Hesse-Darmstadt, the Hereditary Prince of Hesse-Cassel, and the Duke of Marlborough, dined together here.

From the Amsterdam Courant, dated July 20.

Paris, July 21. The Marshal de Tessé has received Orders to take Possession of the Office of General of the Gallies, and is reported he is to sail to Sicily to cause the Duke of Savoy to be Acknowledged King of that Island, and to put him into Possession of it.

From the Antwerp Courant, dated July 20.

Messina, July 17. A second Fleet of Transports with German Troops, from Catalonia, has been seen passing in the Height of Here, towards Genoa. All our Gallies are now victualing, for what Expedition is not yet known. A Ship is arrived at Toulon from Palermo in Sicily with Advice, that there had been some Tumult among the People on Account of the approaching Change of their Government.

From the Antwerp Courant, dated July 20.

July 24. Letters from Madrid of the 10th Instant tell us, that on the 8th the Court received an Account by Express, that the Duke de Popoli with the King's Army continued his March towards Tarragona, having received Notice from General Schomberg that that Town should be evacuated to him the 12th Instant, and that Part of the Imperial Troops were already sailed for Italy. The States of Catalonia were assembled at Barcelona, and after several Conferences had resolved to submit themselves entirely to King Philip. Letters from the Camp before Landau of the 16th Instant relate, that 4 Saps were carrying on at once against the two Half-Moons lying before the first Covered Way, and that but Works were advanced within 60 Yards of them. The Besieged sprang a Mine the 14th, which cost the Lives of about 25 of our Men. Several Batteries were raising, in order to fire on the Body of the Place, which if not relieved will probably be taken by the 10th or 12th of August.
